Trinity Christian Academy, 3900 Rapid Run, Lexington, KY, 40515 ● (859) 271-0079 ● Fax: (859) 271-2134

TRINITY CHRISTIAN ACADEMY

MISSION STATEMENT

The mission of Trinity Christian Academy is to provide its students with a challenging, Biblically-based educational experience designed to help them know, love, and practice that which is true, good and excellent and to prepare them to live purposefully and intelligently in the service of God and man.

In order to accomplish this mission:

1. The school offers its students an education that is both classical and Christian. It is classical in that it draws deeply on the rich heritage of western civilization and culture; it is Christian in that it recognizes the Bible as the final authority in matters of life and thought. Students are encouraged to develop a worldview that integrates Christian faith with all areas of learning.
2. The school functions as a nurturing community in which students are respected as unique individuals created in the image of God, each with special abilities and needs. They are taught by skilled and knowledgeable teachers who love children and are dedicated to helping them realize their highest potential - spiritually, intellectually, physically, socially, and creatively. Classes are kept small so that each student will receive individual attention and have abundant opportunities to participate and lead.
3. The school takes an active interest in the development of its students' intellectual, spiritual, moral and physical habits in the belief that early development of a disciplined lifestyle in the context of a relationship with Jesus Christ will provide a solid foundation for a responsible and joyful life.
4. The school offers its students a rich humanities, arts, music and social studies curriculum, which integrates the study of literature, music and the arts with the study of history and geography. Students come to understand the present and gain perspective on the future through acquiring knowledge of the past. They are warned of evil and error and challenged to live virtuously and nobly through the example of those who have gone before. They learn to think critically and Biblically through engaging in dialogue with outstanding thinkers of the past and present. They are encouraged to express themselves creatively in written and artistic media as they taste and enjoy great literature, art and music.
5. The school offers its students a mathematics and science program that enables them to master the content and skills, which will prepare them to participate knowledgeably in the scientific and technological discussions of the modern world. From the early grades the mathematics curriculum encourages mastery of concepts and skills that are foundational for advanced study and emphasizes the practical application of what is learned to real-life problems. The science curriculum makes use of an approach, which enables the students to acquire a solid understanding of the world in which they live through a direct encounter with the wonders and laws of God's creation.
6. The school offers its students a physical education program that involves them in a variety of physical activities and sports designed to develop their fitness, skills and character.
7. The school offers many additional opportunities for learning in areas not covered in the traditional academic disciplines.
